4½' to 6' ElasTech® Energy Absorbing Lanyard

Double-leg lanyard with internal energy absorber and elasticated legs that expand and contract with the user's movement. Elastic leg construction helps to prevent tripping and snagging hazards compared to regular fixed length 6' lanyards.

- Double-leg 100% Tie-off construction for user mobility.
- Features full-length internal energy absorber with low-profile design.
- Includes alloy steel snap hooks for harness and anchorage connections.
- High-modulus internal elastic won't slack after repeated use.
